DevOps @ Lloyds Banking Group

|	
Why	■ Delivering technology change safely, reliably and at pace
How	■ Bringing together all aspects of engineering and business to collaborate and change the culture around how we work. ■ Driving a coordinated agenda across the bank of cultural, process and technical change in engineering and operational practices. ■ Unlocking business value more rapidly, enabling projects to deliver propositions more quickly and reliably to our customers.
What	■ Strategic direction with many tools, processes and practices across many technologies. ■ Providing best in class tools to develop code, support and guidance in how to use them. ■ Providing enterprise tooling services that meet engineering needs, and where appropriate, federate tooling services to our consumers. ■ Simplified governance to ensure that you canw be as responsive as you need to be to deliver on your commitments.
